DETAILED ACTION

Status of Claims

1. Claims 30-51 and 86 are currently under examination, wherein no claim has been amended in applicant's amendment filed on December 26, 2007. Claims 52-85, 87 and 88 have been withdrawn.

Status of Previous Rejections

2. The previous rejections of claims 30-43, 45-49 and 86 under 35 U.S.C. 103(a) as being unpatentable over Heinrich et al. (US 5,992,546) and the previous rejection of claims 44, 50 and 51 under 35 U.S.C. 103(a) as being unpatentable over Heinrich et al. ('546) as applied to claim 30 above in view of Brandrup-Wognsen et al. (US 5,723,177) as stated in the Office action dated August 23, 2007 have been maintained.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 30-43, 45-49 and 86 are rejected under 35 U.S.C. 103(a) as being unpatentable over Heinrich et al. ('546) as stated in the Office action dated August 23, 2007.

4. Claims 44, 50 and 51 are rejected under 35 U.S.C. 103(a) as being unpatentable over Heinrich et al. ('546) as applied to claim 30 above in view of Brandrup-Wognsen et al. ('177) as stated in the Office action dated August 23, 2007.

Response to Arguments

5. The applicant's arguments filed on December 26, 2007 have been fully considered but they are not persuasive.

The applicant argues that the magnetic saturation of Heinrich et al. ('546) as listed in the Tables 1 and 2 of Heinrich et al. ('546) is more than 2.5 times higher as the range claimed in the instant claim 30; therefore, the structure and composition of the instant invention are different and not obvious in view of Heinrich et al. ('546). In response, the examiner notes that the rejections are based on the prior art's broad disclosure rather than preferred embodiments. See MPEP 2123. As discussed in the Office action dated August 23, 2007, Heinrich et al. ('546) in view of Brandrup-Wognsen et al. ('177) meet all claim limitations of the instant claim 30 and its dependent claims. The rejections of the coercive field strength and the magnetic saturation as claimed in the instant claim 30 based on *In re Best*, 562 F.2d 1252, 1255, 195 USPQ 430, 433 (CCPA 1977), MPEP 2112.01 [R-3] as stated in the Office action dated August 23, 2007 are proper and maintained.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
